# SECTION 4: FIRST AID MEASURES

Product No. 970

Eye Contact: Immediately flush eyes with plenty of water for 15 to 20

minutes. Get medical attention, if irritation or symptoms of

overexposure persists.

Skin Contact: Immediately wash skin with soap and plenty of water. Get

medical attention if irritation develops or persists.

Inhalation: If inhaled, remove to fresh air. If not breathing, give artificial

respiration or give oxygen by trained personnel. Seek

immediate medical attention.

Ingestion: If swallowed, do NOT induce vomiting. Call a physician or

poison control center immediately. Never give anything by

# SECTION 8: EXPOSURE CONTROLS, PERSONAL PROTECTION

Product No. 970

Engineering Controls: Use appropriate engineering control such as process

enclosures, local exhaust ventilation, or other engineering controls to control airborne levels below recommended exposure limits. Good general ventilation should be sufficient to control airborne levels. Where such systems are not effective wear suitable personal protective equipment, which performs satisfactorily and meets OSHA or other recognized

standards. Consult with local procedures for selection, training, inspection and maintenance of the personal

protective equipment.

Skin Protection Description: Chemical-resistant gloves and chemical goggles, face-shield and synthetic apron or coveralls should be used to prevent

contact with eyes, skin or clothing.

Hand Protection Description:

Wear appropriate protective gloves. Consult glove

manufacturer's data for permeability data.

Eye/Face Protection: Wear appropriate protective glasses or splash goggles as

described by 29 CFR 1910.133, OSHA eye and face protection regulation, or the European standard EN 166.

Respiratory Protection: A NIOSH approved air-purifying respirator with an organic

vapor cartridge or canister may be permissible under certain circumstances where airborne concentrations are expected to exceed exposure limits. Protection provided by air purifying respirators is limited. Use a positive pressure air supplied respirator if there is any potential for an uncontrolled release, exposure levels are not known, or any other circumstances where air purifying respirators may not

provide adequate protection.

Other Protective: Facilities storing or utilizing this material should be equipped
